STAR

A Komar company

SOURCING AND MANUFACTURING AT ITS BEST

https://www.star.lk/

OVERVIEW

Founded in 1978, Star Garments is one of the largest exporters of apparel out of Sri Lanka.

Our decades of **experience**, backed by **reliable** and **transparent** business practices, makes Star a partner that our customers and employees **value** and **trust**.

Under the **Komar** umbrella Star has made massive strides in **technological** and **sustainable** progress. This, in turn, has led to an explosion in **growth** that has seen Star become one of the **largest apparel manufacturing** groups in Sri Lanka.

Proudly

KOMAR ONE REPUTATION REAL VALUES

Established in 1908, Komar was founded by Charles Komar on the guiding philosophy “One Reputation, Real Values” and this continuously guides the company each and every day.

With a century-long success in the apparel world, Komar is a global leader in design, sourcing, manufacturing and distribution of apparel. Komar manages a diverse portfolio consisting of owned, licensed and private label brands

Komar is a trusted partner that brings its deep expertise and personalized approach to everything it does with steadfast investment in creativity, innovation, customer service & social responsibility.

Innovation and Development Center
Katunayake, Sri Lanka

ONE STOP
PRODUCT DEVELOPMENT

At the heart of our operations, is a 70,000 sq. ft Innovation and Development Center where ideas are transformed into products. The center features a digital print resource library, sample room, pattern making facilities, world-class design and 3D product development capabilities that enable our teams and customers to work together collaboratively to bring ideas to life.

Our Innovation and Development Center in Sri Lanka is the first passive house design in Southeast Asia, leveraging a rigorous set of design principles focused on energy efficiency.

THE STRATEGIC SRI LANKAN LOCATION

Our strategic Sri Lankan location offers many advantages such as shorter lead times, cost-effective shipping, and a workforce with specialized expertise across a broad range of apparel categories.

THE STAR APPROACH

SUSTAINABLE

Ensuring we're being as environmentally responsible as possible.

INNOVATIVE

Continually exploring and investing in new technologies and processes to improve the art of manufacturing and deliver the best value we can for our customers.

COLLABORATIVE

Employing a hands-on, collaborative approach with our customers, inviting teams to work together in our state of the art, open-air facility.

COMPLIANT

Striving to uphold full compliance in safety, labor laws, government and environmental stipulations and are approved by US Customs for C-TPAT.

COMMITTED

From our talented design team to our production partners from around the world, we take pride in manufacturing garments where the highest level of quality is guaranteed.

SUSTAINABILITY

We take pride in analyzing every step of production to ensure we're being as environmentally responsible as possible.

Star is a member of the Sustainable Apparel Coalition and all of our manufacturing plants are evaluated on the Higg Index Platform annually.

In keeping with our strong commitment to sustainability, our **Innovation and Development** Center is the first **Passive House** design in Southeast Asia, and one of eight factories of its kind in the world.

A global model for sustainability, Passive House design leverages a rigorous set of design principles focused on energy efficiency.

Star's commitment to doing what it's right is not limited to environmental sustainability. We've also committed to becoming a leader in doing what is right for our employees. The Great Place to Work Certification we obtained is testament to this commitment.

Sustainable Apparel Coalition

Higg Index

Great Place To Work.

Star Garments is Sri Lanka's first group of apparel factories to have all its® facilities to be certified CARBON NEUTRAL.

THE 5 YEAR SUSTAINABILITY STRATEGY

The Star Sustainability Strategy focuses on improving the sustainability metrics of our manufacturing operations and building design. With LEED (Leadership in Energy and Environmental Design- by the US Green Building Council) being the world's most highly recognized green building standard, we have obtained the LEED certification for 6 of our facilities in 2021, and have set ourself the ambitious target of obtaining LEED certifications for all other Star owned factories by 2024.

Star has also benchmarked themselves itself against the HIGG Index developed by the Sustainable Apparel Coalition, which has a suite of tools that enables brands, retailers, and facilities to accurately measure and score a company or product's sustainability performance.

PROGRAMS AND SYSTEMS

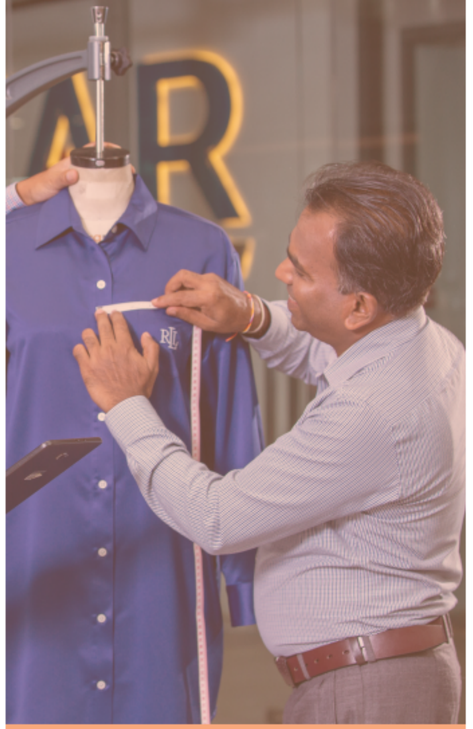

Leadtec Shop Floor Control

The Leadtek shop floor control system allows the production process to be managed in real-time through the use of RFID systems that enable a more productive and efficient factory floor.

Creative Product Development Process

We utilize 2D digital pattern technology and 3D virtual sample renderings to optimize process and provide improved speed to market, better quality and improved efficiency.

Quality Assurance

We have established a proprietary cloud-based quality assurance system to eliminate paper and transposition error using an intuitive tablet, contributing to a fast, reliable and intuitive tablet.

Digital Asset Management Library

We have implemented a digital asset management library that enables easy access to view fabric, trims, etc. we have worked with and have the capability of working with.
